THE BOOK

OF IN-LITE

in-lite

WHY **IN-LITE?**

in-lite is the fastest growing outdoor lighting manufacturer in the industry for a reason. Our high-quality products, patented connection system, and innovative technology, are built with the professional in mind. We are committed to helping professionals grow their business through lighting and beyond by providing unbeatable customer service, extensive training and education, and the best products on the market.

EASY-LOCK
CONNECTOR

The EASY-LOCK Connector is in-lite's patented connection system. The connector pierces the jacket of the low-voltage cable and releases a proprietary gel to create an air-tight seal by simply twisting the cap onto the body of the connector. The EASY-LOCK is made of high quality materials and makes the in-lite system easy to install by removing the need for wire splicing.

" *"[The] EASY-LOCK has solved the most common problem in the lighting profession - call-backs! We have seen our lighting installation call backs drop from a rate of 30% to almost nothing."* **- MATT BELL, IN-SIDER** "

LEARN MORE ABOUT CRI

CRI (COLOR RENDERING INDEX)

So, what is CRI? CRI evaluates the color rendition and accuracy of objects under manufactured light compared to how those objects would look under natural light (100 CRI). The higher the numerical value of CRI, the better the light will reproduce those vibrant, beautiful colors. The quality of in-lite products is unmatched. We use only the highest quality LED chips in our fixtures to ensure the best quality light possible. With light output as high as CRI 98, we promise our lights will make your projects stand out and highlight key elements in the way they deserve.
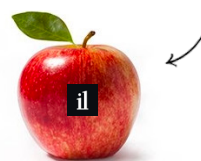

CRI 60-70   CRI 70-80   CRI 80-90   CRI 90-100

"*The support and service I get from the company is unbeatable. When I have a question, it is answered quickly and timely and I have quite frankly never had a problem.*" **- BRANDON DUECK, IN-SIDER**

THE BEST CUSTOMER SERVICE IN THE INDUSTRY

The in-lite team is dedicated to providing you with the support you need every step of the way. Whether you need help with installation, product selection, troubleshooting, installation design, or any other resources we provide - we're happy to help!

Our team is educated, experienced, and ready to answer any questions you may have.

CONTACT US

CHANGE THE WAY YOU SEE COLOR

We have always believed in creating products with the highest quality light output on the market and the concept for our color changing lights was no exception. Unlike other RGB lights in the outdoor living industry, we wanted to truly reimagine the way you see color. By building lights that not only produce extraordinary light quality but also feature innovative technology and control, we continue to push the limit of outdoor lighting.

Unleash your creativity with our TONE products and SMART technology.

SMART SCOPE TONE

SKU: 10401050
Output: 6.0 W
Installation value: 9.5 VA
Color temperature: 3100 K
CRI: RGBW
*Can now emit both the familiar
in-lite warm white and RGB light

SMART EVO FLEX TONE

SKU: 10250400
Output: 2.5 W
Installation value: 4.5 VA
Color temperature: 3100 K
CRI: RGB
*Can now emit both the familiar in-lite
warm white and RGB light

SMART TONE

LEARN MORE ABOUT
SMART TONE

THE CORE OF OUR RGB VISION

We believe that color lighting should be used as an extra layer of lighting in an outdoor space. Adding pops of color around seating areas, patios, outdoor kitchens, and bars, creates a unique vibe that sets the tone for the night ahead. Celebrate holidays, support your favorite sports team, or even set the mood for date night. Combined with our beautiful CRI 90+ white lights on softscapes (trees and plants), creating the perfect atmosphere has never been easier.

IN-LITE
JUST GOT
SMARTER

Our team is dedicated to providing you with the best products on the market to take your projects to the next level. We are constantly developing and designing our system to be adaptable, high quality, and user-friendly.

Hey Google

works with **alexa**

With the use of a SMART BRIDGE and SMART HUB, your in-lite system is now able to operate from anywhere in the world with the click of a button, or the sound of your voice.

IN-
NOVATION

SMART BRIDGE

The SMART BRIDGE is an in-lite smart system accessory that creates a bridge to the internet in order to operate and adjust outdoor lighting from anywhere in the world. Integrate the in-lite smart system with 'smart home' systems like Google Home, Apple Homekit and Amazon Alexa.

LEARN MORE ABOUT SMART PRODUCTS

SMART MOVE

With the wireless motion detector SMART MOVE, your outdoor lighting switches on automatically when you walk or drive past it. This gives you enough light to find your way, so you'll never have to fumble in the dark again!

SMART EXTENDER

The SMART EXTENDER was developed to strengthen the Bluetooth connection to the SMART-HUB 150 and in-lite app indoors due to external factors.
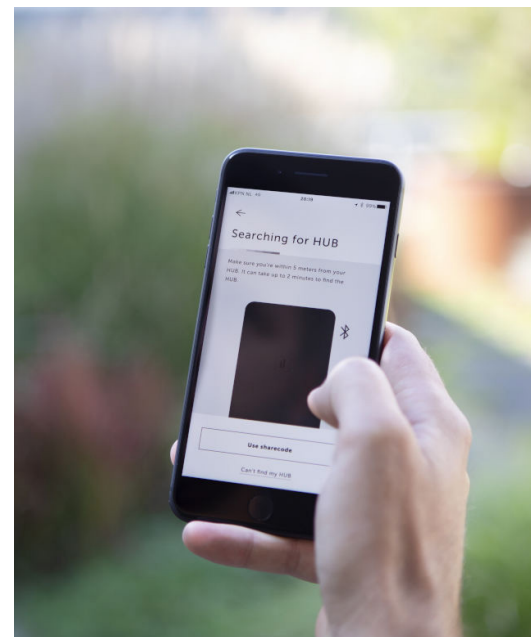

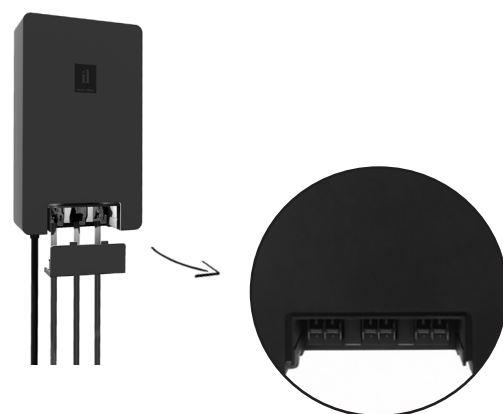

SMART
TRANSFORMER

SMART HUB-150 ★ MUST-HAVE

The SMART HUB-150 transformer is high-quality, modern, and innovative. It is controlled exclusively by the in-lite smartphone app for iOS and Android. All smart products can easily be used in combination with a SMART HUB.

IN-LITE MOTION

in-lite Motion makes it possible to easily tilt the light source in the BIG NERO and BIG NERO NARROW fixtures without having to disassemble anything. A magnet on the in-lite logo on the fixture is used to adjust the light source to the fixture to the desired position and easily create the perfect lighting effect.

THE COMPLETE IN-LITE SYSTEM

HUB-50 & HUB-100 ①

The HUB (or transformer) controls all the lighting in the outdoor space. The system is designed to convert the 120V line voltage from a house into 12V to power your fixtures. The HUB-50 & HUB-100 are in-lite's modern transformers featuring a touch screen, two cable ports (controlled simultaneously), and various settings such as Dusk 'til Dawn.

CABLE ②

The low voltage cable is rolled out from the transformer and run anywhere you would like your fixtures. There are two types available: 14/2 cable and 12/2 cable. With the 14/2 cable, the cable length between the transformer and the cable end may be no longer than 40 meters (132 ft), while the 12/2 cable can handle up to 80 meters (263 ft) and is the industry standard for outdoor lighting.

CABLE SPLIT (CC-2) ③

Want to branch off an existing main line to add more lighting? Use a CC-2 connector to split your cable in no time. Please note that a split counts in the maximum cable length between the transformer and the fixture. The maximum capacity is 50W and be sure to not 'split the split'.

EASY-LOCK ④

The EASY-LOCK is in-lite's patented connection system with a proprietary water-proof gel to eliminate opportunities for corrosion. It comes complete with every fixture and makes installation a breeze.

CABLE END ⑤

The cable can terminate anywhere in the yard and does not need to form a closed system. Cable caps can be placed on the cable ends for a tidy finish and to prevent moisture penetration. These are available in two sizes for different cables.
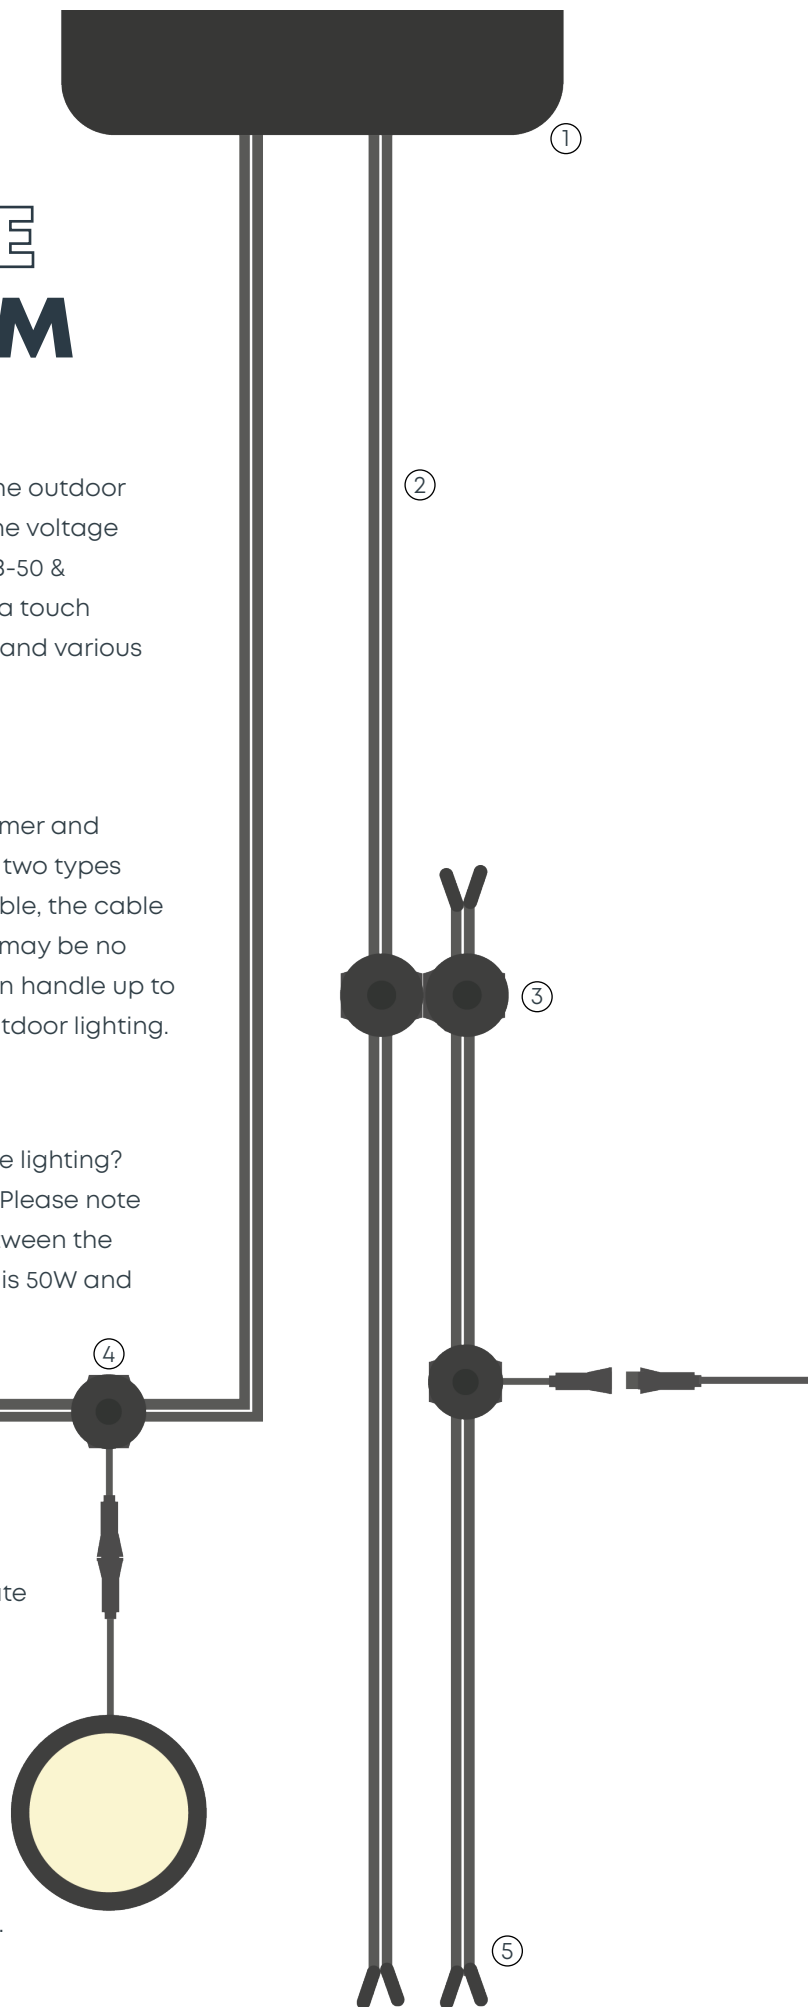

SMART HUB-150 ⑥

The SMART HUB is the most innovative transformer in our product range and it can be operated using the in-lite app and a Bluetooth Low-Energy connection. Install the transformer and the lighting, download the in-lite app and personalize your lighting experience in no time. With the SMART HUB-150, you are able to control each cable port individually. This allows you to create different lighting zones in your outdoor space, where lights can be switched on and off at different times. Use routines to customize the timing of each zone or control them all at once using the in-lite app.

Maximum Cable Length
14/2 cable = 40m (132 ft)
12/2 cable = 80m (263 ft)

ACCESSORIES ⑦

Is the cable connected to an in-lite fixture too short? Extend it with an EXTENSION cord available in 3, 6, or 9 feet. The SPLITTER can also be used to connect two fixtures to one EASY-LOCK.
